

Center Stage Software Webtix Rental Users

Webtix is Center Stage Software's middle-ware product, which is a suite of functions connecting the Internet with box office LAN. Our latest offering the Webtix Rental module offers all the benefits of the full licensed version of Webtix, without the cost.

Compare: Webtix full license is \$5000.00 and works with WintixPro (lists also at \$5000.00). The Webtix rental is \$2.00 a day with no per ticketing charges. The big difference between the two is that instead of the data residing on your own server, the data for the Webtix rental resides on Center Stage Software's server. **Note: all funds from credit card transactions done through Webtix are directly deposited into your venue's bank account.**

Please visit the following links of some of our customers using the Webtix Rental module. The links will take you directly to the Webtix page, not the home page. **NOTE: Most of the links provided show that most of our clients have not opted to modify the Webtix page. To view those of our clients who have done some modification to the Webtix events page are: Guggenheim Entertainment, Stoughton Opera House and Ticketworks.**
